

I have mastered the DT curriculum when...

I am a *reflective learner* and I can critically evaluate my work.

I can use what I know to *solve problems*.

I can think of my own *creative ideas* that are different to those around me.

I can *explore* and *evaluate* existing products.

I understand *design criteria* and can use what I know to fulfil a *specific purpose*.

I can use my *imagination* when designing and making products.

I can use *tools* and *equipment safely* by myself.
